

# Weekly Memo

<b>Date</b>	March 21, 2014
<b>Prepared By</b>	Vaibhav Vijay
<b>Project Manager</b>	Ted Nolan
<b>Team Leader</b>	N/A
<b>Team Members</b>	Aryamman Jain (999554076) Pranav Mehndiratta (999480725) Vaibhav Vijay (1000073029)

## Activities

Task	Assigned To	Due Date	Completed
<i>Design Document</i>			
Draft of New Design Decisions	Team	March 17, 2014	✓
Lessons Learned discussed	Team	March 18, 2014	✓
<i>Storage Server Development</i>			
Algorithm of multiple threading	Team	March 18, 2014	✓
Update storage_get() function w.r.t Transaction	Team	March 19, 2014	✓
Update storage_set() function w.r.t Transaction	Team	March 20, 2014	✓
<i>Final Presentation</i>			
Detailed and technical discussion of team project	Team	Tentative (The week after submitting Milestone 4 storage server document)	IPR

Performance Results and experimental data regarding Milestone 4	Team	Tentative (The week after submitting Milestone 4 storage server document)	IPR
Presentation outline	Team	Tentative (The week after submitting Milestone 4 storage server document)	IPR

## Design Document

Team has already started working on the first draft of new design decisions according to milestone 4 design considerations. There was a brainstorming session in which each of us discussed their lessons learned. Team is expecting a positive feedback in milestone 3 design document and is looking forward to any comments given by CI.

## Storage Server Development

The first thing we did was to decide the algorithm to handle multiple clients access. We have updated `storage_get()` and `storage_set()` function according to this algorithm. Team aims to finish the coding part by next week.
